Client Groups	

INTRODUCTION

A total of 1168 requests were received in 2011. This report summarizes the activity of the Insect Identification Laboratory at Virginia Tech for 2011. The laboratory is located in 205A Price Hall. Eric Day, Lab Manager, and Doug Pfeiffer, Extension Entomologist, Department of Entomology manage the lab. Luke Harris, Charlotte Oliver, Tree Dellinger, and Ethan Robertson also worked in the Lab in 2011.

Of the samples received in 2011, 98% of the samples, 1049 out of 1168, requested control recommendations.

Also from the samples received in 2011, 21% of the samples, 247 out of 1168, were forwarded from the Plant Disease Clinic, managed by Mary Ann Hansen and Elizabeth Bush. The remaining 79% were sent directly.

Specimens are identified and recorded in the lab, then if necessary sent for control recommendations and additional comments from Extension Entomologists who handle particular commodity groups. All specimen data are entered into the Insect I.D. Lab computer database on the Virginia Tech mainframe computer. The database greatly facilitates sorting and storage of the information. Some of the records were sent via microcomputer to the Cooperative National Plant Pest Survey and Detection Program (USDA, APHIS, PPQ). We at Virginia Tech acknowledge support provided by this program.

Whenever possible insects are identified to the species level. Common names are used where possible because of their wide recognition. To facilitate mailing insects and insect damaged plant specimens to the lab, local offices of Virginia Cooperative Extension are provided with Insect Identification and Diagnosis Request forms (form 444-113), alcohol vials, and mailing tubes. Specimens also may be brought directly to the lab or mailed to:

Persons providing identifications and/or control recommendations:

Identifications and control recommendations covering most commodities performed by:

Mr. Eric R. Day Manager, Insect Identification Laboratory

Timely and valuable identifications and/or control recommendations were also provided by:

Dr. Tom Kuhar Assistant Professor of Entomology Vegetable Pests

Dr. Richard D. Fell Professor of Entomology Apiculture and Stinging Insects

Dr. Dini Miller Assistant Professor of Entomology Structural and Household Insects

Dr. Ames Herbert Associate Professor of Entomology Soybeans, Small grains, Peanuts, and cotton

Mr. Steve Hiner Technical Support Staff Aquatic Insects and Invertebrates

Dr. Michael Kosztarab Emeriti Professor of Entomology Scale Insects

Dr. Theresia Dellinger Post-Doctoral Staff Entomology

Dr. Douglas G. Pfeiffer Professor of Entomology Fruit and Nuts

Dr. Scott Salom Associate Professor of Entomology Forest and Conifer

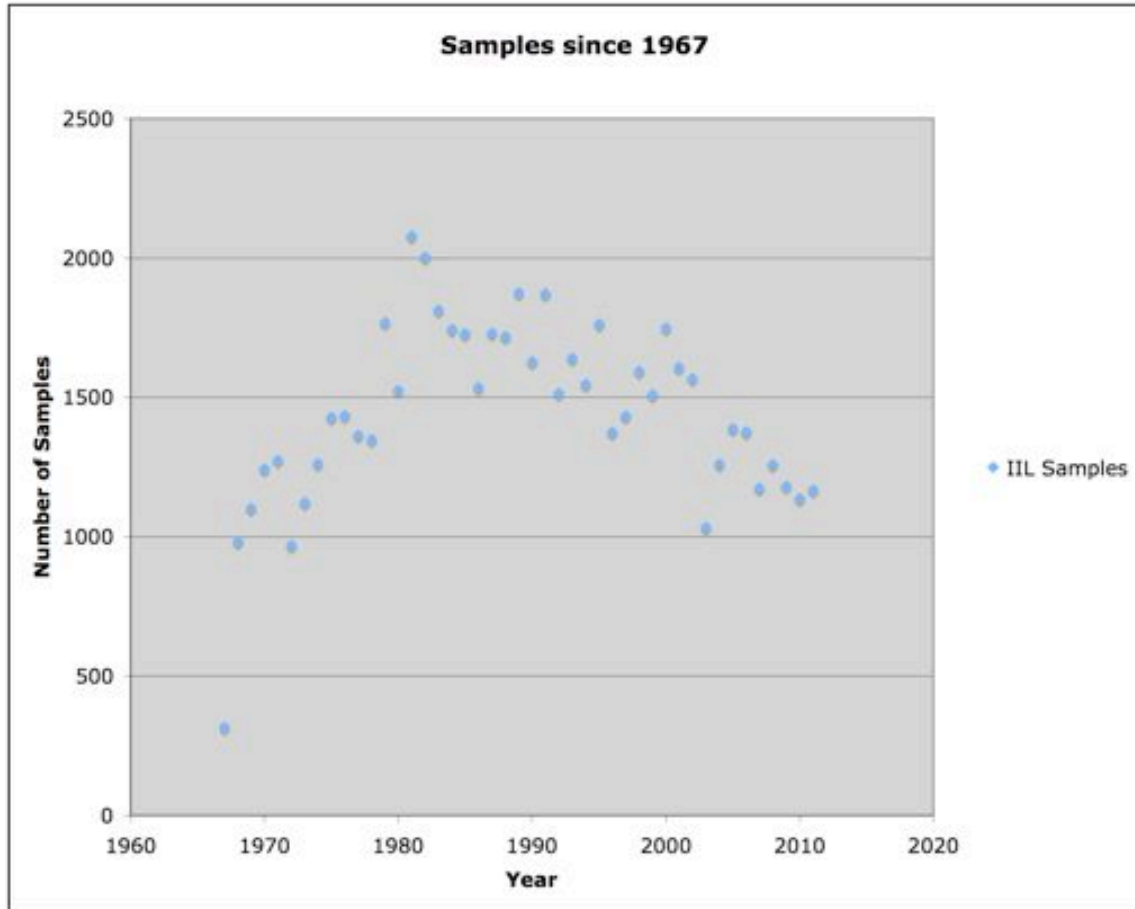

Dr. Peter Schultz Station Director, Hampton Roads Ornamentals

Dr. Paul J. Semtner Professor of Entomology Tobacco

Dr. J. Reese Voshell Professor of Entomology Aquatic Insects

Dr. Roger Youngman Associate Professor of Entomology Corn, Small grains, and Grasses

SAMPLES RECEIVED SINCE 1967 The following table lists the magnitude of activities and services provided by the Insect Identification Laboratory (IIL) and the faculty and staff associated with it since 1967.

HOST CATEGORY AND MOTHS RECEIVED

Count of HOSTCAT	Month												Grand Total
